

# CATHÉDRALE CHRIST CHURCH MONTRÉAL

## Audio Visual System operator

Christ Church Cathedral is looking for Audio Visual system operators to increase our team operating our livestreaming system for our Sunday services, and for occasional special services such as funerals and weddings at other times. The aim is to have a number of people available to share scheduled slots. Candidates with regular availability will be preferred.

### Current AV System

The Cathedral currently uses two remote cameras and one fixed camera in the organ loft. These are managed through our 'LiveStream Studio' software, which allows us to stream to YouTube, Facebook and Zoom as needed. Our cameras have a number of presets, and can also be adjusted according to the needs of the day.

### Role

- The AV operators wire up the cathedral screens before services, turn on the sound, livestream system, and cameras, and ensure that everything is functioning correctly.
- They start the appropriate livestream on time a few minutes before the start of each service, linking into zoom as appropriate.
- They switch cameras/camera angles according to the movement of the liturgy, to ensure that the broadcast is both lively and focus on the action.
- They are responsible for ensuring the quality of the broadcast during services, including sound.
- They bring broadcasts to an end and put all the equipment away after use.
- They preset the YouTube slots on our channel for the following week.

Training and support will be given.

### Where

This post is in person at Christ Church Cathedral, 635 Ste Catherine Ouest, Montreal H3A 2B8.

### When

We need operators for Sunday mornings (7:30 am to 12:30 pm), Sunday afternoon (3:30 pm to 5:30 pm), and for additional ad hoc slots. These positions are available immediately.

### Candidates will need to be:

- Able to work with confidence with the technology after training. An ability to work with IT and digital technology is essential.
- Interested in creative visual form and presenting our Cathedral worship in the best way
- Curious to explore further possibilities of the system so that we can develop its use to maximum capacity
- Able to problem solve and keep their cool when technical glitches occur
- Punctual, as these are live broadcasts
- Sympathetic with the aims of Christ Church Cathedral and its liturgical and musical mission

Some background in live broadcast is an asset, but not required.

Ability to function in both English and French is a plus.

For further information and to apply, please send a cover letter and a CV to [dean@montrealcathedral.ca](mailto:dean@montrealcathedral.ca).

Applications will be reviewed as they are received.
